We grow all our seedlings & produce by the non-certified Organic Method, using Certified Organic Vermont Compost and Organic plants and seeds whenever available, which is almost always. On occasion organic seed or starts are not available. In that case we try to source both the healthiest and most local option. We never use synthetic chemicals, whether it fertilizer, pesticide, herbicide or fungicide. We do not use any GMO products. Please feel free to ask us if you have any questions.

### **LETTUCE & GREENS**

**Hotshot Mustard Mix** (21 days) Open-pollinated. Spice up your greens with this flavorful mix! A variety of spicy mustard flavors, colors and shapes. Includes our favorite spicy mustards and some secret ingredients for a signature mix with extreme diversity. Spicy blend of mustards and other favorites.

**Dark Red Lolla Rosa** (30 days) Red-edged, heavily frilled leaves provide loft, texture, and color.

**Jericho Romaine Lettuce** (60 days) Open-pollinated. Summer romaine lettuce bred in Israel's hot dry climate to stand high temperatures. Can grow dense hefty 2' tall heads of light green sword-shaped upright leaves. Yet it remains crisp, juicy and unusually sweet, most years resisting bolting well into July.

**Lettuce Mix** -Various varieties leaf, romaine and green and colored

**Dwarf Blue Curled Scotch Kale** OG (30 days baby, 56 days mature) Open-pollinated. Dense frilly finely curled blue-green leaves on compact upright 12–16" plants stand well, maintain color and resist yellowing in cold and heat. Hardy and productive.

## Kale Mix

## Nero Di Toscana Kale

## Shanghai Pac Choy

# TOMATOES

**Bobcat** (65 days) F-1 hybrid. Determinate. Impeccable looks, disease resistance, 10–13 oz. early-midseason maturity and excellent taste. A massive plant with huge leaves, thick strong stems and big fruit set. \$8 large pot

**Principe Borghese** (75 day) 6 oz determinate

**Jet Star Tomato** (72 days) Compact Indeterminate F-1 hybrid. Early tomato ripening prolific quantities of cosmetically perfect 7–8 oz. globes with outstanding flavor. Firm fruits almost never scar or crack.

**Pineapple** 85 day bi-color red & yellow

**Pruden's Purple Pink Brandywine** (82 days) Open Pollinated Indeterminate Heirloom with potato-leaf foliage. Brandywine can be fussy to grow, has problems with catfacing, early blight disease and sometimes late maturity, but plenty of commercial growers have had success, even in northern New England. Meaty with just the perfect hint of tartness, the oblate beefsteak fruits average 1 lb., ripening throughout the season.

**Old Striped German** (85 days) Open Pollinated Indeterminate Heirloom. My Favorite Fresh Eating Tomato but doesn't store well. Golden Streaked Reddish Skin and Interior. Fruits up to 1 ½ pounds! Meaty & Delicious!

## Heirloom Mix

**Roma Paste** (76 days) HEIRLOOM. The classic sauce and paste tomato, Compact determinate plants resistant to Verticillium and Fusarium wilts. Meaty interiors and few seeds.

**Amish Paste** (85 days) Open Pollinated Indet. Heirloom. Excellent red thick meaty sauce and canning tomato, heavy yield, good flavor, large 8oz heart-shaped fruit. Larger and better than Roma. Needs room and good nutrition.

**Juliet Grape Tomato** (60 days) F-1 hybrid. Indet. Plum-shaped fruits come in clusters, each truss bearing 6–8 of the 1–2 oz grapes for an astonishing total of 50–80 glossy red fruits per plant. With an engaging sweetness, they make good stewing tomatoes, excellent salad tomatoes, and, despite their juiciness, a tangy sauce with a diverse complex richness and full sweet tomato flavor. Great for drying, cut them in half, flip out the seeds and dehydrate. The highest yielding most versatile tomato out there—both for greenhouse and field use in all culinary ways.

**Honey Bunch Red Grape Tomato** (45 days) Indeterminate F-1 hybrid. Luscious over-the-top sweetness with a honeyed nuance that could be habit-forming. For maximum enjoyment, wait until it ripens fully to a bright red in the field. That's easy because they are very crack resistant and seemingly hold field quality forever. Bright red 10–14g 1x1-1/2" fruits, the size of cherries, but the shape of grapes. And they are oh so early!

**Aosta Valley** (65 days) Open-pollinated. Indeterminate. NW Italy short-season tomato with exceptionally rich flavor. Prolific clusters of 10–12 small (1½") shiny red tomatoes hold on the vine and can be picked all at once. The five-sided fruits have thick walls and tiny seeds. Excellent fresh, stewed or added to sauce

**Peacevine Cherry Tomato** (78 days) Open-pollinated. Rampant Indeterminate. Selected by Peace Seeds from Sweet 100 cherry tomato and almost identical in fruit size and growth habit. Bears gazillions of sweet clusters each with 8 or so 1" fruits of "wonderful sweet/tart rich flavor."

**Sun Gold Cherry Tomato** (57 days) F-1 hybrid. Indeterminate. To quote one customer, "Without these little babies, there's no summer." A perfect combination of deep sweetness with a hint of acid tartness, we are drawn to Sun Gold

like candy. Small fruits, borne in prolific clusters, ripen very early to a rich apricot color and keep producing till frost. Very prone to split so pick early when rains are forecast. Brix 8.

## EGGPLANT

**Swallow Eggplant** (51 days) F-1 hybrid. Don't believe you can grow eggplant in this cold part of the world? Swallow could make you a believer because it is *early*, producing glossy purple-black tender fruit of the elongated (1-3/4x7") Asian type without the bitterness often associated with larger eggplants. Non-staking.

## BRASSICAS

### BROCCOLI

**Monflor Broccoli** (53 days) Bred for a flat and loose head, high quality florets separate with just one cut. Easy to grow, with good heat tolerance.

**Tendergreen Broccoli** (67 days) F-1 hybrid. Early with a 6–7" semi-domed head, though not stalwart in extreme heat. The medium-large beads do a good job of shedding water. Pleasing blue-green color, tender and delicious flavor. Modest 2–3" (occasionally 4") side shoots follow.

**Supergreen Broccoli** (85 days) F-1 hybrid. 7" wide and 3" deep pound-plus tight-beaded heads with vigorous side heads. Compact, snugly plant. Excellent flavor and texture raw.

**Waltham Broccoli** (92 days) Open-pollinated. Developed in 1951 and long considered the standard OP fall broccoli. 6" heads with medium beads on attractive stocky 20" plants. Waltham delivers good-sized central heads, but no side shoots. Will not head properly in heat.

### CAULIFLOWER

**Charming Snow Cauliflower** (60 days) F-1 hybrid. Dependable producer of uniform 1-2lb 6–7" heads. Our first early cauliflower.

**Graffiti Purple Cauliflower** (80 days) F-1 hybrid. Brilliant purple true cauliflower heads on large plants with dark green leaves. Delicious raw and cooked. Tolerant of heat and drought.

**Candid Charm Cauliflower** (95 days) F-1 hybrid. Very large 3-5 lb snow-white attractive tight heads. Easy to grow.

### CABBAGE

**Golden Acre Cabbage** (62 days) Open-pollinated. Heads average 3–5 lb. Short stems with sparse wrapper leaves and medium-sized core keep it compact. Home gardeners esteem its excellent flavor, particularly in the sweet tender hearts. Grey-green head with white interior. Not long standing.

**Blues Chinese Cabbage** (57 days) Napa type that can be used for either spring or early fall plantings. The 10" tall heads have a fresh green color, bright white ribs and grow with vigor.

**Mammoth Red Rock Cabbage** (100 days) Open-pollinated. A large late storage cabbage with firm flattened round 5–8 lb heads, 8–10" across, red-purple to the core, good keeper, crisp sweet taste, goes back to 1889.

**Gustus Brussel Sprouts** (99 days) F-1 hybrid. medium-sized, slightly oval, remarkably uniform, very tasty.

## PEPPERS

**King of the North Sweet Pepper** (70 days) Open-pollinated. A good choice for those who want early marketable blocky peppers.

**Anaheim Hot Pepper** (78 days) Open-pollinated. Also known as California Chile and Chile Verde. Cultivated for canning in a factory near Anaheim around 1900. Anaheim is the pepper typically used for chiles rellenos. 7" long fruits tapering to a point turn from dark-green to red at maturity. Pungent, mildly hot. 900-2,500 Scovilles.

**Jalapeño Hot Pepper** (75 days) Open-pollinated. HOT! 3x1" sausage-shaped blunt fruits mature early. Characteristic brown netting appears as fruit ripens from dark green to dark red. 4,000-6,500 Scovilles.

## HERBS

**Sweet Basil OG** (70 days) Heavy-yielding. For drying, all-around great eating and pesto.

**Red Rubin Basil** (78 days) Open-pollinated Highly ornamental dark purplish-bronze foliage.

**Spicy Globe Basil** (70 days) Open-pollinated. Grows to about 8" and maintains a compact mound of light green leaves and white flowers. Its leaves are small, thin and strongly scented. Great as an ornamental border, in a windowbox, or as an indoor potted plant that can be snipped for culinary use.

**Bouquet Dill OG** (55 days) Usually grown for dill weed production because its leaves are sweet and refined.

**Gigante d'Italia Parsley** (70 days) Open-pollinated Heirloom Rich sweet flavor. Flat-leaved. Grows to 1'.

**Krausa Parsley OG** (75 days) Open-pollinated Very prolific and most winter hardy, stems so sweet they taste almost like a miniature celery: thick, solid, crunchy, yummy. Dense triple-curved medium-green parsley holds its color without developing white or brown spots. Can stand the heat and were still beautiful and juicy in October.

**Caribe Cilantro OG** (55 days) Lots of excellent eating foliage and great flavor. Longstanding

**German Thyme** 10–12" perennial. Flavorful, calms the nerves and soothes headaches. Bees love its short lavender flower spikes. Hardy Zones 4–9.

**Sweet Marjoram** (80-95 days) 1' plant with grey-green rounded leaves of enchanting sweet fragrance. Cut often to prevent flowering. Subject to damping off; do not overwater. Likes well-drained dry soil.

**Lemon Balm** – Open-Pollinated Strongly aromatic herb with lemony fragrance and excellent medicinal and culinary qualities. Shiny green leaves on full plants up to 2' tall. Harvest before flowering. Transplant seedlings 18" apart  
Attracts bees · Vigorous spreading habit · Perennial

**Summer Savory** (70 days) OP. Annual grows to 1½' with narrow dark green leaves and lavender flowers.

**German Chamomile** (75 days) OP Self-seeding annual with tiny daisy-like flowers excellent dried for tea. Plant 4-6" apart. Harvest flower heads regularly for best yields. 24-30" tall · Spreading habit

**Lavender** (100 days) English lavender with a compact, bushy habit. Nice range of bloom colors, from pale blue to dark violet. Usually begins flowering in the second year. Hardy in zones 5-8, but can survive Zone 4 winters when mulched or grown in a south-facing location.

## MISC SEEDLINGS

**Aunt Molly's Ground Cherry Husk Cherry OG** (72 days) OP. Easy to Grow low bush space 18". Though native to Central America, this heirloom was widely grown in Poland and has been boarded by the Slow Food Ark of Taste. "Sweet and zesty." Some compare the flavor to pineapple.

**Ministro Cucumber** (49 days) F-1 Early, flavorful, and high yielding. Produces very dark green, uniform, 8-9" slicing cucumbers. Small seed cavity. Skin is thinner than the average slicing cucumber. Monoecious

**Blacktail Mountain Watermelon** (71 days) Open-pollinated. Early, Hardy & Stores well. Fruits averaging 6-7 lb dark green, almost black, with faint stripes, flesh orange red like a Sugar Baby only with a cleaner more pleasing texture, very sweet, juicy and crunchy.

**Delicious 51 Muskmelon** (88 days) Open-pollinated for cold climates. Distinctively ribbed with sparse netting, its sweet 3 lb fruits turn yellow and are sometimes soft when ripe. Dark orange interiors with sweet juicy aromatic flesh.

**Cocozelle Zucchini** (53 days) Open-pollinated. Rich-flavored zucchini ribbed with light green stripes Heirloom

**Success PM Straightneck** – OP, Prolific, disease-resistant Smooth, uniform and attractive fruit. Harvest at 6-7"

**Carnival Acorn Winter Squash** (85 days) F-1 hybrid. Semi-Bush acorn type flecked with shades of green, gold produces medium-sized fruits near the crowns for easy picking. Nutty squash aroma delicious with its full-bodied sweetness.

**Crackerjack Mix Marigold** Early mix of orange, gold, yellow. Large fully doubled flowers on tall 30" plants that rarely need staking.

**Carpet of Snow Alyssum** Annual. Free-flowering ground cover, blossoming from late spring well into fall. Cascading habit. 4" dwarf white. Widely recognized nectar source for beneficial insects. Transplant seedlings 4-8" apart. Easy to grow, likes sun, tolerates some shade. To extend their season, shear plants halfway back four weeks after bloom. Will tolerate temperatures below 25° 6-packs \$3
